

fleet list

Wijnne Barends manages a young and well-maintained fleet which is tailored seamlessly to market requirements.

High cubic and multi-purpose. Ideal for the transport of high-volume dry cargoes such as timber products, grain and peat moss, but also heavier products such as steel and aluminium. Their relatively large holds make the vessels suitable for many project cargoes and most of them are able to load containers. And since the fleet is comprised of similar sister ships and series of tonnage classes, we always have a ship in position to meet your requirements, quickly and efficiently.

Wijnne Barends is Europe's leading Short Sea Specialist. Our navigation area is from the White Sea to the Black Sea: Scandinavia, the Baltic States, Western Europe and the Mediterranean. The vessels have the highest Ice Class so they can be of service to you during winter months. The modern fleet meets the strict European environmental standards and the requirements for the transport of hazardous substances.

Wijnne Barends is ISO 9002 and ISM certified, and all of the ships in management by Wijnne Barends sail under the Dutch flag.
